Hard Services

Client	E.ON UK plc
Location	Connah's Quay, Grain, Kingsnorth and Ironbridge Power Stations
Services	Hard Services Contract

In April 2010, Norec were proud to announce our success in being awarded the Hard Services Facilities Management contract on behalf of E.ON UK plc at four UK locations; Connah's Quay, Grain, Kingsnorth and Ironbridge Power Stations.

The contract commenced on 1st April this year for a period of 4 years. The works involve a selection of facilities management operations with each location having its own specific scope of works.

At Connah's Quay Power Station, Norec are now responsible for store keeping, general duties, pest control, waste management, buildings maintenance and industrial plant cleaning. At Grain and Kingsnorth Power Stations, Norec's duties include grounds management, waste management, plant cleaning and civil works. Ironbridge Power Station is a similar scope, with the addition of business and office services support.

The award of this contract is significant in contribution to the delivery of Norec's growth strategy for diversification into related services contracts within an industry where we are already well established as materials handling operation and maintenance contractors.

It is hoped that this win will enable Norec to use it as a building block to secure further contracts with other clients, confident that our company and our colleagues are the best in the business.
